Community Engagement Matters (now more than ever!)

About the workshop

Community engagement is about ensuring that those most impacted by social challenges have a say in designing and implementing solutions. Their participation and that of their families, neighbours and trusted leaders should be an integral part of achieving results. The shift in power when community members own and help produce the result leads to greater impact.

The workshop will be presented by **Paul Schmitz** (see overleaf for more information) and will:

- enhance your community engagement knowledge and skills
- provide the opportunity to work in small groups
- allow you to frame ideas and tools in very practical ways, connected to participants' day to day experience
