

How to add Māori keyboard and integrate it into Word with English Thanks to Fred Glover from Megabyte for developing these instructions.

These instructions will show you how to add the Māori keyboard to windows 10 and integrate it with the English language so you can proof English and Māori words without having to switch between languages.

Click on start menu and type in "region". Region & language settings should come up as a result. Click on this.

Once in there, click on your language and click options

Settings 命 Home Region & language Find a setting Country or region Windows and apps might use your country or region to give you local content Time & Language 🗟 Date & time New Zealand ₄亭 Region & language Languages Q Speech Windows display language Windows features like Settings and File Explorer will appear in this language. English (United States) \sim Preferred languages Apps and websites will appear in the first language in the list that they support. + Add a language A^字 English (New Zealand) Language pack available ↑ ↓ Options Remove

In the new window click on add a keyboard and then scroll until you find Māori. Click on this.

Get help

Now you want to set the Māori keyboard as default. Click on the start menu and type in *typing* and click on *typing* settings

Scroll down and click on Advanced keyboard settings

This will open up a web browser. Use the dropdown box to select *Māori* which will bring up download links. Click on *Download (32 bit)*. This will be the default for most people <u>unless you know you have 64bit version of office installed</u>

Finally choose the appropriate architecture (32-bit or 64-bit) from the download links provided.

If you're not sure what you're using see What version of Office am I using?

Once the file is downloaded, double-click it to install it.

Newer vers	ions	Office 2	013 Offi	ce 2010		
Maori				\sim		
Language	Culture (ll-cc)	Native name	Extent of localization	Description	Links	Download Instructions
Maori	mi-nz	Reo Māori	Partial	The pack includes your selected display language for some Office applications and includes proofing tools.	Download (32-bit) Download (64-bit)	Pānuitia me pēhea e whirihoratia ngā mōkī i muri i te tāutanga.

Once the file is downloaded, open and run and it will start installing. This shouldn't take too long and you will need to close any Office applications you have open

Once installed you should be good to go. You will be able to type in Māori macrons (e.g. ā, ē, ī) and proof in Māori and English without having to constantly switch between languages and keyboards.
