

## Leading Community-Led Change

Ehare taku toa he toa, takitahi, engari taku toa takitini  
Success comes from the strength of the collective and not of the lone individual.

We need leadership from lots of different people, not just from a few exceptional people we call leaders.

Community-Led Development challenges our way of thinking, acting and leading. It tests our assumptions about leadership – who has it, how do we grow it, how do we connect the diverse voices. It nurtures and develops emerging local leaders. This workshop explores frameworks and tools for thinking, acting and leading amid complexity, where leadership is primarily about continuous learning on the job.
